## DETAILED ACTION

This is a response to applicant's amendment received on 10/20/03.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by E. G. Blachere.

Blachere discloses the invention including a circular rear base plate 12, plurality of food conveying paddles 6 being rectilinear in shape, the end of each of the paddle located adjacent the rear base plate being located at least in partially trailing relationship (see, Fig. 2), one forward located annular ring 22 and a constant angle greater than 0° and less than 30° or 40°(see, Fig. 1). Also, Blachere's device is capable of performing the function set forth in the preamble.

### ***Response to Arguments***

3. Applicant argues that Blachere does not disclose vanes extending at angle relative to the radius of the cylinder. However, Blachere teaches vanes 6 extending at angle relative to the radius of the cylinder illustrated in Fig. 2.

In response to applicant's argument that "there is no disclosure or suggestion in Blachere of the vanes being capable of conveying elongated food product by axially aligning such food

Art Unit: 3724

against a base plate”, a recitation of the intended use of the claimed invention must result in a *structural difference* between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
